## Building Steel Structure Closed House

- Start Built in 2009
- 12 chicken houses
- 300,000 Chicken per Batch

# **BENEFITS OF THIS E-FARMING SYSTEM**

- **Allows us to setup a better SOP for operation and monitoring**
- **Allows to recall data for problems solving**
- **Better monitoring of the chicken health and growth**
- **Utilizing technology to reduce human errors in farming**
- **Able to operate from long distance**

# UPGRADE THE SYSTEM TO CLOUD SYSTEM (IOT)

---

- **Started in 2016**
- **Better Data managements and storage**
- **Allow many users to monitor**
- **Do not need to maintained Farm Servers**
- **Remove operation**
- **To prepare for future AI control**

清美有限公司

- **Steel Structure Closed House System**
- **10 chicken houses**
- **200,000 Chicken per Batch**

清美有限公司

FLFAM

# IOT-farming system

- Using tablet or handphone to operate – thus able to monitor the whole farm at any location
- The controller is able to take over others if others break down
- All data keep in the farm and cloud
- More control options

# IOT-farming system

清美有限公司  
CHOP CHEONG BEE SDN BHD

FLFAM

EXPANSION BOX

17cm REMOTE DISPLAY

CONTROLLER

# IOT-FARMING SYSTEM

## Short Coming!!!

- Need to many wiring to connect to multiple devices.
- Lack of data processing and data analysis.
- Lack of artificial intelligent and machine learning for future planning.
- Heavy investment.

# SMART AND PRECISION FARMING (LADANG PINTAR)

## Benefits:

- ❖ Easy access via simple device with data connection.
- ❖ Data processing and data analysis for future planning.
- ❖ Mistakes can be identified immediately.
- ❖ Low cost.

# SUMMARY DISCUSSION

Transform the agriculture sector by introducing smart and precision farming

Establish Internet of Things (IoT) technology ecosystem and facilities in agriculture training premises and research station.

Collect, monitor, and store data for analysis purpose. Data is important to help and reduce farmers costs of operation.

Pilot smart and precision farming application and trying to allow more farmers to use.

# Thank You
